

Graphics Feature Status

- Canvas: **Software only, hardware acceleration unavailable**
- Canvas out-of-process rasterization: **Disabled**
- Direct Rendering Display Compositor: **Disabled**
- Compositing: **Software only. Hardware acceleration disabled**
- Multiple Raster Threads: **Enabled**
- OpenGL: **Disabled**
- Rasterization: **Software only. Hardware acceleration disabled**
- Raw Draw: **Disabled**
- Video Decode: **Software only. Hardware acceleration disabled**
- Video Encode: **Software only. Hardware acceleration disabled**
- Vulkan: **Disabled**
- WebGL: **Software only, hardware acceleration unavailable**
- WebGL2: **Software only, hardware acceleration unavailable**
- WebGPU: **Disabled**

Problems Detected

- WebGPU has been disabled via blacklist or the command line.
*Disabled Features: **webgpu***
- Accelerated video encode has been disabled, either via blacklist, about:flags or the command line.
*Disabled Features: **video_encode***
- Gpu compositing has been disabled, either via blacklist, about:flags or the command line. The browser will fall back to software compositing and hardware acceleration will be unavailable.
*Disabled Features: **gpu_compositing***

ANGLE Features

- **allowCompressedFormats** (Frontend workarounds): **Enabled**: true
Allow compressed formats
- **cacheCompiledShader** (Frontend features) [anglebug:7036](#): **Enabled**: true
Enable to cache compiled shaders
- **disableAnisotropicFiltering** (Frontend workarounds): **Disabled**
Disable support for anisotropic filtering
- **disableProgramBinary** (Frontend features) [anglebug:5007](#): **Disabled**
Disable support for GL_OES_get_program_binary
- **disableProgramCachingForTransformFeedback** (Frontend workarounds): **Disabled**
On some GPUs, program binaries don't contain transform feedback varyings
- **emulatePixelLocalStorage** (Frontend features) [anglebug:7279](#): **Disabled**: false
Emulate ANGLE_shader_pixel_local_storage using shader images
- **enableCaptureLimits** (Frontend features) [anglebug:5750](#): **Disabled**
Set the context limits like frame capturing was enabled
- **enableCompressingPipelineCacheInThreadPool** (Frontend workarounds) [anglebug:4722](#): **Disabled**: false
Enable compressing pipeline cache in thread pool.
- **enableProgramBinaryForCapture** (Frontend features) [anglebug:5658](#): **Disabled**
Even if FrameCapture is enabled, enable GL_OES_get_program_binary
- **forceDepthAttachmentInitOnClear** (Frontend workarounds) [anglebug:7246](#): **Disabled**
Force depth attachment initialization on clear ops
- **forceGLErrorChecking** (Frontend features) <https://issuetracker.google.com/220069903>: **Disabled**: (IsAndroid() && isSwiftShader)
Force GL error checking (i.e. prevent applications from disabling error checking)
- **forceInitShaderVariables** (Frontend features): **Disabled**
Force-enable shader variable initialization

- **forceRobustResourceInit** (Frontend features) [anglebug:6041](#): Disabled
Force-enable robust resource init
- **loseContextOnOutOfMemory** (Frontend workarounds): Enabled: true
Some users rely on a lost context notification if a GL_OUT_OF_MEMORY error occurs
- **scalarizeVecAndMatConstructorArgs** (Frontend workarounds) [1165751](#): Disabled: false
Always rewrite vec/mat constructors to be consistent
- **allocateNonZeroMemory** (Vulkan features) [anglebug:4384](#): Disabled: false
Fill new allocations with non-zero values to flush out errors.
- **allowGenerateMipmapWithCompute** (Vulkan features) [anglebug:4551](#): Disabled:
supportsSubgroupQuadOpsInComputeShader &&
mSubgroupExtendedTypesFeatures.shaderSubgroupExtendedTypes &&
maxComputeWorkGroupInvocations >= 256 && ((isAMD && !isWindows()) || isNvidia ||
isSamsung)
Use the compute path to generate mipmaps on devices that meet the minimum requirements, and the performance is better.
- **asyncCommandQueue** (Vulkan features) [anglebug:4324](#): Disabled: false
Use CommandQueue worker thread to dispatch work to GPU.
- **bottomLeftOriginPresentRegionRectangles** (Vulkan workarounds): Disabled:
IsAndroid()
On some platforms present region rectangles are expected to have a bottom-left origin, instead of top-left origin as from spec
- **bresenhamLineRasterization** (Vulkan features): Enabled: true
Enable Bresenham line rasterization via VK_EXT_line_rasterization extension
- **clampPointSize** (Vulkan workarounds) [anglebug:2970](#): Disabled: isNvidia &&
nvidiaVersion.major < uint32_t(IsWindows() ? 430 : 421)
The point size range reported from the API is inconsistent with the actual behavior
- **compressVertexData** (Vulkan workarounds): Disabled
Compress vertex data to smaller data types when possible. Using this feature makes ANGLE non-conformant.
- **deferFlushUntilEndRenderPass** (Vulkan workarounds)
<https://issuetracker.google.com/issues/166475273>: Enabled: !isQualcommProprietary
Allow glFlush to be deferred until renderpass ends
- **depthClamping** (Vulkan workarounds) [anglebug:3970](#): Disabled: isNvidia &&
mPhysicalDeviceFeatures.depthClamp &&
ExtensionFound("VK_EXT_depth_clip_enable", deviceExtensionNames) && (!isLinux() ||
nvidiaVersion.major > 418u)
The depth value is not clamped to [0, 1] for floating point depth buffers.
- **disableFifoPresentMode** (Vulkan workarounds) [anglebug:3153](#): Disabled: IsLinux() &&
isIntel
VK_PRESENT_MODE_FIFO_KHR causes random timeouts
- **disableFlippingBlitWithCommand** (Vulkan workarounds) [anglebug:3498](#): Disabled:
IsAndroid() && isQualcommProprietary
vkCmdBlitImage with flipped coordinates blits incorrectly.
- **disallowMixedDepthStencilLoadOpNoneAndLoad** (Vulkan workarounds)
[anglebug:7370](#): Disabled: isARM && armDriverVersion < ARMDriverVersion(38, 1, 0)
Disallow use of LOAD_OP_NONE for only one of the depth or stencil aspects of a depth/stencil attachment
- **eglColorspaceAttributePassthrough** (Vulkan features) [anglebug:7319](#): Disabled:
IsAndroid() && isSamsung
Support passthrough of EGL colorspace attribute values
- **emulateAdvancedBlendEquations** (Vulkan features) [anglebug:3586](#): Disabled:
!mFeatures.supportsBlendOperationAdvanced.enabled && !isIntel
Emulate GL_KHR_blend_equation_advanced
- **emulateDithering** (Vulkan features) [anglebug:6755](#): Disabled: IsAndroid()
Emulate OpenGL dithering
- **emulateR32fImageAtomicExchange** (Vulkan workarounds) [anglebug:5535](#): Enabled:
true
Emulate r32f images with r32ui to support imageAtomicExchange.

- **emulateTransformFeedback** (Vulkan features) [anglebug:3205](#): **Enabled**:
(!mFeatures.supportsTransformFeedbackExtension.enabled &&
mPhysicalDeviceFeatures.vertexPipelineStoresAndAtomics == 1U)
Emulate transform feedback as the VK_EXT_transform_feedback is not present.
- **emulatedPrerotation180** (Vulkan features) [anglebug:4901](#): **Disabled**
Emulate 180-degree prerotation.
- **emulatedPrerotation270** (Vulkan features) [anglebug:4901](#): **Disabled**
Emulate 270-degree prerotation.
- **emulatedPrerotation90** (Vulkan features) [anglebug:4901](#): **Disabled**
Emulate 90-degree prerotation.
- **enableMultisampledRenderToTexture** (Vulkan workarounds) [anglebug:4937](#): **Disabled**:
mFeatures.supportsMultisampledRenderToSingleSampled.enabled ||
mFeatures.supportsMultisampledRenderToSingleSampledGOOGLEX.enabled ||
(supportsIndependentDepthStencilResolve && !isSwiftShader && !(IsWindows() &&
(isIntel || isAMD)))
Expose EXT_multisampled_render_to_texture
- **enablePreRotateSurfaces** (Vulkan features) [anglebug:3502](#): **Disabled**: IsAndroid() &&
supportsNegativeViewport
Enable Android pre-rotation for landscape applications
- **enablePrecisionQualifiers** (Vulkan features) [anglebug:3078](#): **Enabled**: !
(IsPixel2(mPhysicalDeviceProperties.vendorID, mPhysicalDeviceProperties.deviceID) &&
(mPhysicalDeviceProperties.driverVersion < kPixel2DriverWithRelaxedPrecision)) &&
!IsPixel4(mPhysicalDeviceProperties.vendorID, mPhysicalDeviceProperties.deviceID)
Enable precision qualifiers in shaders
- **explicitlyEnablePerSampleShading** (Vulkan workarounds) [anglebug:6876](#): **Disabled**:
isARM
Explicitly enable per-sample shading if the fragment shader contains the sample qualifier
- **exposeNonConformantExtensionsAndVersions** (Vulkan workarounds) [anglebug:5375](#):
Disabled: kExposeNonConformantExtensionsAndVersions
Expose GLES versions and extensions that are not conformant.
- **forceContinuousRefreshOnSharedPresent** (Vulkan features)
<https://issuetracker.google.com/229267970>: **Disabled**: false
Force to create vulkan swapchain with continuous refresh on shared present
- **forceD16TexFilter** (Vulkan workarounds) [anglebug:3452](#): **Disabled**: IsAndroid() &&
isQualcommProprietary
*VK_FORMAT_D16_UNORM does not support
VK_FORMAT_FEATURE_SAMPLED_IMAGE_FILTER_LINEAR_BIT, which prevents
OES_depth_texture from being supported.*
- **forceFallbackFormat** (Vulkan workarounds): **Disabled**
Force a fallback format for angle_end2end_tests
- **forceFragmentShaderPrecisionHighpToMediump** (Vulkan workarounds)
<https://issuetracker.google.com/184850002>: **Disabled**: false
Forces highp precision in fragment shader to mediump.
- **forceMaxUniformBufferSize16KB** (Vulkan workarounds)
<https://issuetracker.google.com/161903006>: **Disabled**: isQualcommProprietary &&
isAdreno540
Force max uniform buffer size to 16K on some device due to bug
- **forceNearestFiltering** (Vulkan workarounds): **Disabled**
Force nearest filtering when sampling.
- **forceNearestMipFiltering** (Vulkan workarounds): **Disabled**
Force nearest mip filtering when sampling.
- **forceStaticVertexStrideState** (Vulkan workarounds)
<https://bugs.fuchsia.dev/p/fuchsia/issues/detail?id=107106>: **Disabled**:
mFeatures.supportsExtendedDynamicState.enabled && isARM
*Force static state for VK_DYNAMIC_STATE_VERTEX_INPUT_BINDING_STRIDE_EXT
due to driver bugs*
- **forceSubmitImmutableTextureUpdates** (Vulkan app workarounds) [anglebug:6929](#):
Disabled

Force submit updates to immutable textures

- **forceTextureLodOffset1** (Vulkan workarounds): **Disabled**
Increase the minimum texture level-of-detail by 1 when sampling.
- **forceTextureLodOffset2** (Vulkan workarounds): **Disabled**
Increase the minimum texture level-of-detail by 2 when sampling.
- **forceTextureLodOffset3** (Vulkan workarounds): **Disabled**
Increase the minimum texture level-of-detail by 3 when sampling.
- **forceTextureLodOffset4** (Vulkan workarounds): **Disabled**
Increase the minimum texture level-of-detail by 4 when sampling.
- **generateSPIRVThroughGlslang** (Vulkan features) [anglebug:4889](#): **Disabled**:
kUseSpirvGenThroughGlslang
Translate SPIR-V through glslang.
- **logMemoryReportCallbacks** (Vulkan features): **Disabled**: false
Log each callback from VK_EXT_device_memory_report
- **logMemoryReportStats** (Vulkan features): **Disabled**: false
Log stats from VK_EXT_device_memory_report each swap
- **mapUnspecifiedColorSpaceToPassThrough** (Vulkan features): **Disabled**
Use VK_COLOR_SPACE_PASS_THROUGH_EXT for EGL_NONE or unspecified color spaces
- **mutableMipmapTextureUpload** (Vulkan features) [anglebug:7308](#): **Enabled**: !
(!isWindows() && !isIntel)
Enable uploading the previously defined mutable mipmap texture.
- **overrideSurfaceFormatRGB8ToRGBA8** (Vulkan workarounds) [anglebug:6651](#): **Enabled**:
true
Override surface format GL_RGB8 to GL_RGBA8
- **padBuffersToMaxVertexAttribStride** (Vulkan workarounds) [anglebug:4428](#): **Disabled**:
isAMD || isSamsung
Vulkan considers vertex attribute accesses to count up to the last multiple of the stride. This additional access supports AMD's robust buffer access implementation. AMDVLK in particular will return incorrect values when the vertex access extends into the range that would be the stride padding and the buffer is too small. This workaround limits GL_MAX_VERTEX_ATTRIB_STRIDE to a maximum value and pads up every buffer allocation size to be a multiple of the maximum stride.
- **perFrameWindowSizeQuery** (Vulkan workarounds) [anglebug:3623](#): **Disabled**: IsAndroid() || isIntel() || (!isWindows() && !isAMD) || IsFuchsia() || isSamsung || displayVk->isWayland()
Vulkan swapchain is not returning VK_ERROR_OUT_OF_DATE when window resizing
- **permanentlySwitchToFramebufferFetchMode** (Vulkan features): **Disabled**:
isTileBasedRenderer
Whether the context should permanently switch to framebuffer fetch mode on first encounter
- **persistentlyMappedBuffers** (Vulkan features) [anglebug:2162](#): **Enabled**: true
Persistently map buffer memory to reduce map/unmap IOCTL overhead.
- **precisionSafeDivision** (Vulkan workarounds): **Disabled**: isSamsung || isAMD
Special case handling for platforms that do not generate 1.0f even when the dividend and divisor have the same value
- **preferAggregateBarrierCalls** (Vulkan workarounds) [anglebug:4633](#): **Enabled**:
isImmediateModeRenderer
Single barrier call is preferred over multiple calls with fine grained pipeline stage dependency information
- **preferCPUForBufferSubData** (Vulkan features)
<http://issuetracker.google.com/200067929>: **Disabled**: isARM
Prefer use CPU to do bufferSubData instead of staged update.
- **preferDeviceLocalMemoryHostVisible** (Vulkan features) [anglebug:7047](#): **Enabled**:
!isDiscreteGPU
Prefer adding HOST_VISIBLE flag for DEVICE_LOCAL memory when picking memory types
- **preferDrawClearOverVkCmdClearAttachments** (Vulkan workarounds)
<https://issuetracker.google.com/166809097>: **Disabled**: isQualcommProprietary

On some hardware, clear using a draw call instead of `vkCmdClearAttachments` in the middle of render pass due to bugs

- **preferDriverUniformOverSpecConst** (Vulkan features) [anglebug:7406](#): **Enabled**:
(isQualcommProprietary && mPhysicalDeviceProperties.driverVersion < kPixel4DriverWithWorkingSpecConstSupport) || isARM || isPowerVR || isSwiftShader
Prefer using driver uniforms instead of specialization constants.
- **preferLinearFilterForYUV** (Vulkan features) [anglebug:7382](#): **Disabled**
Prefer to use `VK_FILTER_LINEAR` for `VkSamplerYcbcrConversion`
- **preferSkippingInvalidateForEmulatedFormats** (Vulkan workarounds) [anglebug:6860](#): **Enabled**: `isImmediateModeRenderer`
Skipping invalidate is preferred for emulated formats that have extra channels over re-clearing the image
- **preferSubmitAtFBOBoundary** (Vulkan workarounds)
<https://issuetracker.google.com/187425444>: **Disabled**: `isARM`
Submit commands to driver at each FBO boundary for performance improvements.
- **provokingVertex** (Vulkan features): **Enabled**: `true`
Enable provoking vertex mode via `VK_EXT_provoking_vertex` extension
- **retainSPIRVDebugInfo** (Vulkan features) [anglebug:5901](#): **Disabled**:
`getEnableValidationLayers()`
Retain debug info in SPIR-V blob.
- **roundOutputAfterDithering** (Vulkan workarounds) [anglebug:6953](#): **Disabled**: `isQualcomm`
Round output after dithering to workaround a driver bug that rounds the output up
- **shadowBuffers** (Vulkan features) [anglebug:4339](#): **Disabled**: `false`
Allocate a shadow buffer for GL buffer objects to reduce `glMap` latency.*
- **supportsAndroidHardwareBuffer** (Vulkan features): **Disabled**
`VkDevice` supports the `VK_ANDROID_external_memory_android_hardware_buffer` extension
- **supportsAndroidNativeFenceSync** (Vulkan features) [anglebug:2517](#): **Disabled**
`VkDevice` supports the `EGL_ANDROID_native_fence_sync` extension
- **supportsBlendOperationAdvanced** (Vulkan features) [anglebug:3586](#): **Enabled**:
`ExtensionFound("VK_EXT_blend_operation_advanced", deviceExtensionNames)`
`VkDevice` supports `VK_EXT_blend_operation_advanced` extension.
- **supportsColorWriteEnable** (Vulkan features) [anglebug:7161](#): **Disabled**
`VkDevice` supports `VK_EXT_color_write_enable` extension
- **supportsCustomBorderColor** (Vulkan features) [anglebug:3577](#): **Enabled**:
`mCustomBorderColorFeatures.customBorderColors == 1U &&`
`mCustomBorderColorFeatures.customBorderColorWithoutFormat == 1U`
`VkDevice` supports the `VK_EXT_custom_border_color` extension
- **supportsDepthClipControl** (Vulkan features) [anglebug:5421](#): **Enabled**:
`mDepthClipControlFeatures.depthClipControl == 1U`
`VkDevice` supports `VK_EXT_depth_clip_control` extension.
- **supportsDepthStencilResolve** (Vulkan features) [anglebug:4836](#): **Enabled**:
`mFeatures.supportsRenderpass2.enabled &&`
`mDepthStencilResolveProperties.supportedDepthResolveModes != 0`
`VkDevice` supports the `VK_KHR_depth_stencil_resolve` extension with the `independentResolveNone` feature
- **supportsExtendedDynamicState** (Vulkan features) [anglebug:5906](#): **Enabled**:
`mExtendedDynamicStateFeatures.extendedDynamicState == 1U`
`VkDevice` supports `VK_EXT_extended_dynamic_state` extension
- **supportsExtendedDynamicState2** (Vulkan features) [anglebug:5906](#): **Disabled**:
`mExtendedDynamicState2Features.extendedDynamicState2 == 1U`
`VkDevice` supports `VK_EXT_extended_dynamic_state2` extension
- **supportsExternalFenceCapabilities** (Vulkan features): **Enabled**: `true`
`VkInstance` supports the `VK_KHR_external_fence_capabilities` extension
- **supportsExternalFenceFd** (Vulkan features) [anglebug:2517](#): **Disabled**:
`ExtensionFound("VK_KHR_external_fence_fd", deviceExtensionNames)`
`VkDevice` supports the `VK_KHR_external_fence_fd` extension

- **supportsExternalMemoryDmaBufAndModifiers** (Vulkan features) [anglebug:6248](#): **Disabled**: ExtensionFound("VK_EXT_external_memory_dma_buf", deviceExtensionNames) && ExtensionFound("VK_EXT_image_drm_format_modifier", deviceExtensionNames)
VkDevice supports the VK_EXT_external_memory_dma_buf and VK_EXT_image_drm_format_modifier extensions
- **supportsExternalMemoryFd** (Vulkan features): **Enabled**: ExtensionFound("VK_KHR_external_memory_fd", deviceExtensionNames)
VkDevice supports the VK_KHR_external_memory_fd extension
- **supportsExternalMemoryFuchsia** (Vulkan features): **Disabled**: ExtensionFound("VK_FUCHSIA_external_memory", deviceExtensionNames)
VkDevice supports the VK_FUCHSIA_external_memory extension
- **supportsExternalMemoryHost** (Vulkan features): **Enabled**: ExtensionFound("VK_EXT_external_memory_host", deviceExtensionNames)
VkDevice supports the VK_EXT_external_memory_host extension
- **supportsExternalSemaphoreCapabilities** (Vulkan features): **Enabled**: true
VkInstance supports the VK_KHR_external_semaphore_capabilities extension
- **supportsExternalSemaphoreFd** (Vulkan features): **Enabled**: ExtensionFound("VK_KHR_external_semaphore_fd", deviceExtensionNames)
VkDevice supports the VK_KHR_external_semaphore_fd extension
- **supportsExternalSemaphoreFuchsia** (Vulkan features): **Disabled**: ExtensionFound("VK_FUCHSIA_external_semaphore", deviceExtensionNames)
VkDevice supports the VK_FUCHSIA_external_semaphore extension
- **supportsFilteringPrecision** (Vulkan features): **Enabled**: ExtensionFound("VK_GOOGLE_sampler_filtering_precision", deviceExtensionNames)
VkDevice supports the VK_GOOGLE_sampler_filtering_precision extension
- **supportsFragmentShaderPixelInterlock** (Vulkan features): **Disabled**: mFragmentShaderInterlockFeatures.fragmentShaderPixelInterlock == 1U
VkDevice supports the VK_EXT_fragment_shader_interlock extension and has the fragmentShaderPixelInterlock feature
- **supportsFragmentShadingRate** (Vulkan features) [anglebug:7172](#): **Disabled**: canSupportFragmentShadingRate(deviceExtensionNames)
VkDevice supports VK_KHR_fragment_shading_rate extension
- **supportsGGPFrameToken** (Vulkan features): **Disabled**:
VkDevice supports the VK_GGP_frame_token extension
- **supportsGeometryStreamsCapability** (Vulkan features) [anglebug:3206](#): **Disabled**: mTransformFeedbackFeatures.geometryStreams == 1U
Implementation supports the GeometryStreams SPIR-V capability.
- **supportsHostQueryReset** (Vulkan features) [anglebug:6692](#): **Enabled**: (mHostQueryResetFeatures.hostQueryReset == 1U)
VkDevice supports VK_EXT_host_query_reset extension
- **supportsImage2dViewOf3d** (Vulkan features) [anglebug:7320](#): **Disabled**: mImage2dViewOf3dFeatures.image2DViewOf3D == 1U && mImage2dViewOf3dFeatures.sampler2DViewOf3D == 1U
VkDevice supports VK_EXT_image_2d_view_of_3d
- **supportsImageCubeArray** (Vulkan features) [anglebug:3584](#): **Enabled**: mPhysicalDeviceFeatures.imageCubeArray == 1U
VkDevice supports the imageCubeArray feature properly
- **supportsImageFormatList** (Vulkan features) [anglebug:5281](#): **Enabled**: ExtensionFound("VK_KHR_image_format_list", deviceExtensionNames)
Enable VK_IMAGE_CREATE_MUTABLE_FORMAT_BIT by default for ICDs that support VK_KHR_image_format_list
- **supportsImagelessFramebuffer** (Vulkan features) [anglebug:7553](#): **Enabled**: mImagelessFramebufferFeatures.imagelessFramebuffer == 1U
VkDevice supports VK_KHR_imageless_framebuffer extension
- **supportsIncrementalPresent** (Vulkan features): **Disabled**: ExtensionFound("VK_KHR_incremental_present", deviceExtensionNames)
VkDevice supports the VK_KHR_incremental_present extension

- **supportsIndexTypeUint8** (Vulkan features) [anglebug:4405](#): **Disabled**:
`mIndexTypeUint8Features.indexTypeUint8 == 1U`
VkDevice supports the VK_EXT_index_type_uint8 extension
- **supportsLockSurfaceExtension** (Vulkan features): **Disabled**: `IsAndroid()`
Surface supports the EGL_KHR_lock_surface3 extension
- **supportsMultiDrawIndirect** (Vulkan features) [anglebug:6439](#): **Enabled**:
`mPhysicalDeviceFeatures.multiDrawIndirect == 1U`
VkDevice supports the multiDrawIndirect extension
- **supportsMultisampledRenderToSingleSampled** (Vulkan features) [anglebug:4836](#):
Disabled: `mFeatures.supportsRenderpass2.enabled &&`
`mFeatures.supportsDepthStencilResolve.enabled &&`
`mMultisampledRenderToSingleSampledFeatures.multisampledRenderToSingleSampled == 1U`
VkDevice supports the VK_EXT_multisampled_render_to_single_sampled extension
- **supportsMultisampledRenderToSingleSampledGOOGLEX** (Vulkan features) [anglebug:4836](#): **Disabled**:
`!mFeatures.supportsMultisampledRenderToSingleSampled.enabled &&`
`mFeatures.supportsRenderpass2.enabled &&`
`mFeatures.supportsDepthStencilResolve.enabled &&`
`mMultisampledRenderToSingleSampledFeaturesGOOGLEX.multisampledRenderToSingleS == 1U`
VkDevice supports the VK_GOOGLEX_multisampled_render_to_single_sampled extension
- **supportsMultiview** (Vulkan features) [anglebug:6048](#): **Enabled**:
`mMultiviewFeatures.multiview == 1U`
VkDevice supports the VK_KHR_multiview extension
- **supportsNegativeViewport** (Vulkan features): **Enabled**: `supportsNegativeViewport`
The driver supports inverting the viewport with a negative height.
- **supportsPipelineCreationCacheControl** (Vulkan features) [anglebug:5881](#): **Disabled**:
`mPipelineCreationCacheControlFeatures.pipelineCreationCacheControl &&`
`!isSwiftShader`
VkDevice supports VK_EXT_pipeline_creation_cache_control extension
- **supportsPipelineCreationFeedback** (Vulkan features) [anglebug:5881](#): **Enabled**:
`ExtensionFound("VK_EXT_pipeline_creation_feedback", deviceExtensionNames) ||`
`mPhysicalDeviceProperties.apiVersion >= (((uint32_t)(0)) << 29) | (((uint32_t)(1)) << 22) |`
`((uint32_t)(3)) << 12) | ((uint32_t)(0)))`
VkDevice supports VK_EXT_pipeline_creation_feedback extension
- **supportsPipelineRobustness** (Vulkan features) [anglebug:5845](#): **Enabled**:
`mPipelineRobustnessFeatures.pipelineRobustness == 1U &&`
`mPhysicalDeviceFeatures.robustBufferAccess`
VkDevice supports VK_EXT_pipeline_robustness extension
- **supportsPipelineStatisticsQuery** (Vulkan features) [anglebug:5430](#): **Disabled**:
`mPhysicalDeviceFeatures.pipelineStatisticsQuery == 1U`
VkDevice supports the pipelineStatisticsQuery feature
- **supportsPrimitiveTopologyListRestart** (Vulkan features) [anglebug:3832](#): **Enabled**:
`mPrimitiveTopologyListRestartFeatures.primitiveTopologyListRestart == 1U`
VkDevice supports VK_EXT_primitive_topology_list_restart extension.
- **supportsPrimitivesGeneratedQuery** (Vulkan features) [anglebug:5430](#): **Disabled**:
`mPrimitivesGeneratedQueryFeatures.primitivesGeneratedQuery == 1U`
VkDevice supports VK_EXT_primitives_generated_query extension
- **supportsProtectedMemory** (Vulkan features) [anglebug:3965](#): **Disabled**:
`(mProtectedMemoryFeatures.protectedMemory == 1U) && !isARM`
VkDevice supports protected memory
- **supportsRasterizationOrderAttachmentAccess** (Vulkan features) [anglebug:7604](#):
Disabled
VkDevice supports VK_EXT_rasterization_order_attachment_access extension
- **supportsRenderPassLoadStoreOpNone** (Vulkan features) [anglebug:5371](#): **Enabled**:
`ExtensionFound("VK_EXT_load_store_op_none", deviceExtensionNames)`

- VkDevice supports VK_EXT_load_store_op_none extension.*
- **supportsRenderPassStoreOpNone** (Vulkan features) [anglebug:5055](#): **Disabled**:
!mFeatures.supportsRenderPassLoadStoreOpNone.enabled &&
ExtensionFound("VK_QCOM_render_pass_store_ops", deviceExtensionNames)
VkDevice supports VK_QCOM_render_pass_store_ops extension.
- **supportsRenderpass2** (Vulkan features): **Enabled**:
ExtensionFound("VK_KHR_create_renderpass2", deviceExtensionNames)
VkDevice supports the VK_KHR_create_renderpass2 extension
- **supportsShaderFloat16** (Vulkan features) [anglebug:4551](#): **Disabled**:
mShaderFloat16Int8Features.shaderFloat16 == 1U
*VkDevice supports the VK_KHR_shader_float16_int8 extension and has the
shaderFloat16 feature*
- **supportsShaderFramebufferFetch** (Vulkan features): **Enabled**: (IsAndroid() && isARM) ||
isSwiftShader
Whether the Vulkan backend supports coherent framebuffer fetch
- **supportsShaderFramebufferFetchNonCoherent** (Vulkan features): **Enabled**:
(IsAndroid() && !(isARM || isQualcomm)) || isSwiftShader
Whether the Vulkan backend supports non-coherent framebuffer fetch
- **supportsShaderStencilExport** (Vulkan features): **Enabled**:
ExtensionFound("VK_EXT_shader_stencil_export", deviceExtensionNames)
VkDevice supports the VK_EXT_shader_stencil_export extension
- **supportsSharedPresentableImageExtension** (Vulkan features): **Disabled**
VkSurface supports the VK_KHR_shared_presentable_images extension
- **supportsSurfaceCapabilities2Extension** (Vulkan features): **Disabled**
VkInstance supports the VK_KHR_get_surface_capabilities2 extension
- **supportsSurfaceProtectedCapabilitiesExtension** (Vulkan features): **Disabled**
VkInstance supports the VK_KHR_surface_protected_capabilities extension
- **supportsSurfaceProtectedSwapchains** (Vulkan features): **Disabled**: IsAndroid()
VkSurface supportsProtected for protected swapchains
- **supportsSurfacelessQueryExtension** (Vulkan features): **Disabled**
VkInstance supports the VK_GOOGLE_surfaceless_query extension
- **supportsTimestampSurfaceAttribute** (Vulkan features) [anglebug:7489](#): **Disabled**:
IsAndroid() && ExtensionFound("VK_GOOGLE_display_timing", deviceExtensionNames)
Platform supports setting frame timestamp surface attribute
- **supportsTransformFeedbackExtension** (Vulkan features) [anglebug:3206](#): **Disabled**:
mTransformFeedbackFeatures.transformFeedback == 1U
Transform feedback uses the VK_EXT_transform_feedback extension.
- **supportsVertexInputDynamicState** (Vulkan features) [anglebug:7162](#): **Disabled**
VkDevice supports VK_EXT_vertex_input_dynamic_state extension
- **supportsYUVSamplerConversion** (Vulkan features): **Enabled**:
mSamplerYcbcrConversionFeatures.samplerYcbcrConversion != 0U
VkDevice supports the VK_KHR_sampler_ycbcr_conversion extension
- **supportsYuvTarget** (Vulkan features): **Disabled**
*VkDevice supports VK_ANDROID_render_to_external_format and
VK_EXT_ycbcr_attachment*
- **swapbuffersOnFlushOrFinishWithSingleBuffer** (Vulkan features) [anglebug:6878](#):
Disabled: IsAndroid()
*Bypass deferredFlush with calling swapbuffers on flush or finish when in Shared Present
mode*
- **useMultipleDescriptorsForExternalFormats** (Vulkan workarounds) [anglebug:6141](#):
Enabled: true
Return a default descriptor count for external formats.
- **useNonZeroStencilWriteMaskStaticState** (Vulkan workarounds) [anglebug:7556](#):
Disabled: isARM && armDriverVersion < ARMDriverVersion(40, 0, 0)
*Work around a driver bug where 0 in stencil write mask static state would make
thecorresponding dynamic state malfunction in the presence of discard or alpha to
coverage*

- **waitIdleBeforeSwapchainRecreation** (Vulkan workarounds) [anglebug:5061](#): **Disabled**: `!isAndroid() && !isARM`
Before passing an oldSwapchain to `VkSwapchainCreateInfoKHR`, wait for queue to be idle. Works around a bug on platforms which destroy oldSwapchain in `vkCreateSwapchainKHR`.
- **warmUpPipelineCacheAtLink** (Vulkan features) [anglebug:5881](#): **Enabled**: `!isARM && !isPowerVR && !isQualcommProprietary && !(isLinux() && isIntel) && !(isChromeOS()) && isSwiftShader`
Warm up the Vulkan pipeline cache at link time

DAWN Info

<CPU> Vulkan backend - llvmpipe (LLVM 15.0.0, 256 bits)

[Default Toggle Names]

- **lazy_clear_resource_on_first_use**: <https://crbug.com/dawn/145>: Clears resource to zero on first usage. This initializes the resource so that no dirty bits from recycled memory is present in the new resource.
- **use_temporary_buffer_in_texture_to_texture_copy**: <https://crbug.com/dawn/42>: Split texture-to-texture copy into two copies: copy from source texture into a temporary buffer, and copy from the temporary buffer into the destination texture when copying between compressed textures that don't have block-aligned sizes. This workaround is enabled by default on all Vulkan drivers to solve an issue in the Vulkan SPEC about the texture-to-texture copies with compressed formats. See #1005 (<https://github.com/KhronosGroup/Vulkan-Docs/issues/1005>) for more details.
- **vulkan_use_d32s8**: <https://crbug.com/dawn/286>: Vulkan mandates support of either `D32_FLOAT_S8` or `D24_UNORM_S8`. When available the backend will use `D32S8` (toggle to on) but setting the toggle to off will make it use the `D24S8` format when possible.
- **vulkan_use_s8**: <https://crbug.com/dawn/666>: Vulkan has a pure stencil8 format but it is not universally available. When this toggle is on, the backend will use `S8` for the stencil8 format, otherwise it will fallback to `D32S8` or `D24S8`.
- **disallow_unsafe_apis**: <http://crbug.com/1138528>: Produces validation errors on API entry points or parameter combinations that aren't considered secure yet.
- **use_vulkan_zero_initialize_workgroup_memory_extension**: <https://crbug.com/dawn/1302>: Initialize workgroup memory with `OpConstantNull` on Vulkan when the Vulkan extension `VK_KHR_zero_initialize_workgroup_memory` is supported.
[WebGPU Forced Toggles - enabled]
- **disallow_spirv**: <https://crbug.com/1214923>: Disallow usage of SPIR-V completely so that only WGSL is used for shader modules. This is useful to prevent a Chromium renderer process from successfully sending SPIR-V code to be compiled in the GPU process.
[Supported Features]
- texture-compression-bc
- pipeline-statistics-query
- timestamp-query
- depth-clip-control
- depth32float-stencil8
- indirect-first-instance
- dawn-internal-usages
- dawn-native

<CPU> Vulkan backend - SwiftShader Device (Subzero)

<CPU> OpenGL backend - ANGLE (Google, Vulkan 1.3.0 (SwiftShader Device (Subzero) (0x000C0DE)), SwiftShader driver-5.0.0)

[Default Toggle Names]

- **lazy_clear_resource_on_first_use:** <https://crbug.com/dawn/145>: Clears resource to zero on first usage. This initializes the resource so that no dirty bits from recycled memory is present in the new resource.
- **disable_base_vertex:** <https://crbug.com/dawn/343>: Disables the use of non-zero base vertex which is unsupported on some platforms.
- **disable_base_instance:** <https://crbug.com/dawn/343>: Disables the use of non-zero base instance which is unsupported on some platforms.
- **disable_indexed_draw_buffers:** <https://crbug.com/dawn/582>: Disables the use of indexed draw buffer state which is unsupported on some platforms.
- **disable_snorm_read:** <https://crbug.com/dawn/667>: Disables reading from Snorm textures which is unsupported on some platforms.
- **disallow_unsafe_apis:** <http://crbug.com/1138528>: Produces validation errors on API entry points or parameter combinations that aren't considered secure yet.
- **flush_before_client_wait_sync:** <https://crbug.com/dawn/633>: Call glFlush before glClientWaitSync to work around bugs in the latter
- **use_placeholder_fragment_in_vertex_only_pipeline:** <https://crbug.com/dawn/136>: Use a placeholder empty fragment shader in vertex only render pipeline. This toggle must be enabled for OpenGL ES backend, and serves as a workaround by default enabled on some Metal devices with Intel GPU to ensure the depth result is correct. [WebGPU Forced Toggles - enabled]
- **disallow_spirv:** <https://crbug.com/1214923>: Disallow usage of SPIR-V completely so that only WGSL is used for shader modules. This is useful to prevent a Chromium renderer process from successfully sending SPIR-V code to be compiled in the GPU process. [Supported Features]
