

# Installing Qt Quick Effect Maker

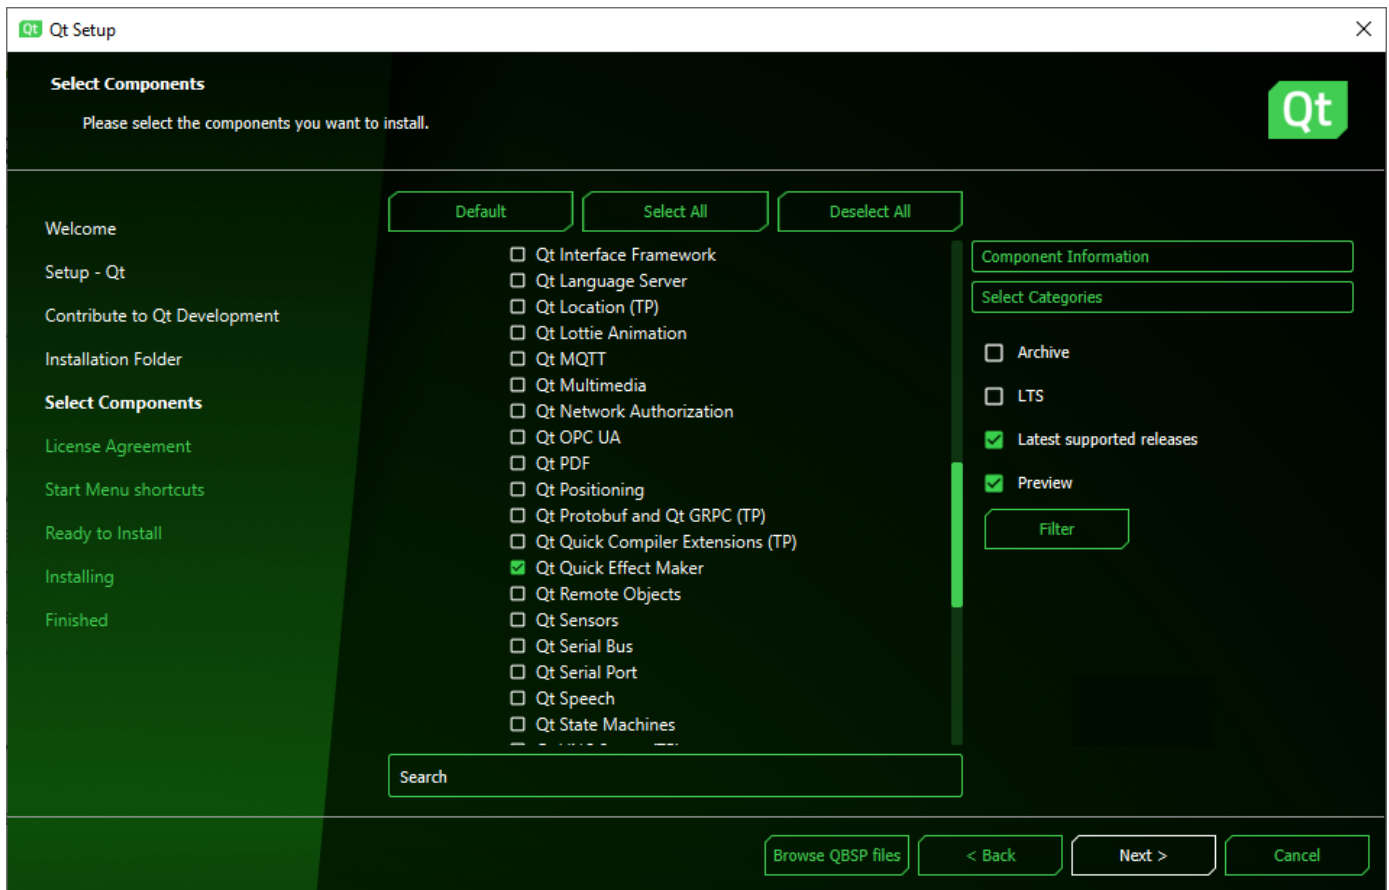

You can run Qt Quick Effect Maker as a standalone tool but it is also included in [Qt Design Studio](#).

## Installing Qt Quick Effect Maker

You can install Qt Quick Effect Maker with the Unified Qt Installer.

1. Sign in to [Qt Account Downloads](#).
2. Download **Unified Qt Installer**.
3. Open the Installer.
4. Continue to **Installation Folder** and select **Custom installation**.
5. Select **Next**.
6. Go to **Qt > Qt 6.5** (or newer version) > **Additional Libraries** and select **Qt Quick Effect Maker**.

## Opening Qt Quick Effect Maker from Qt Design Studio

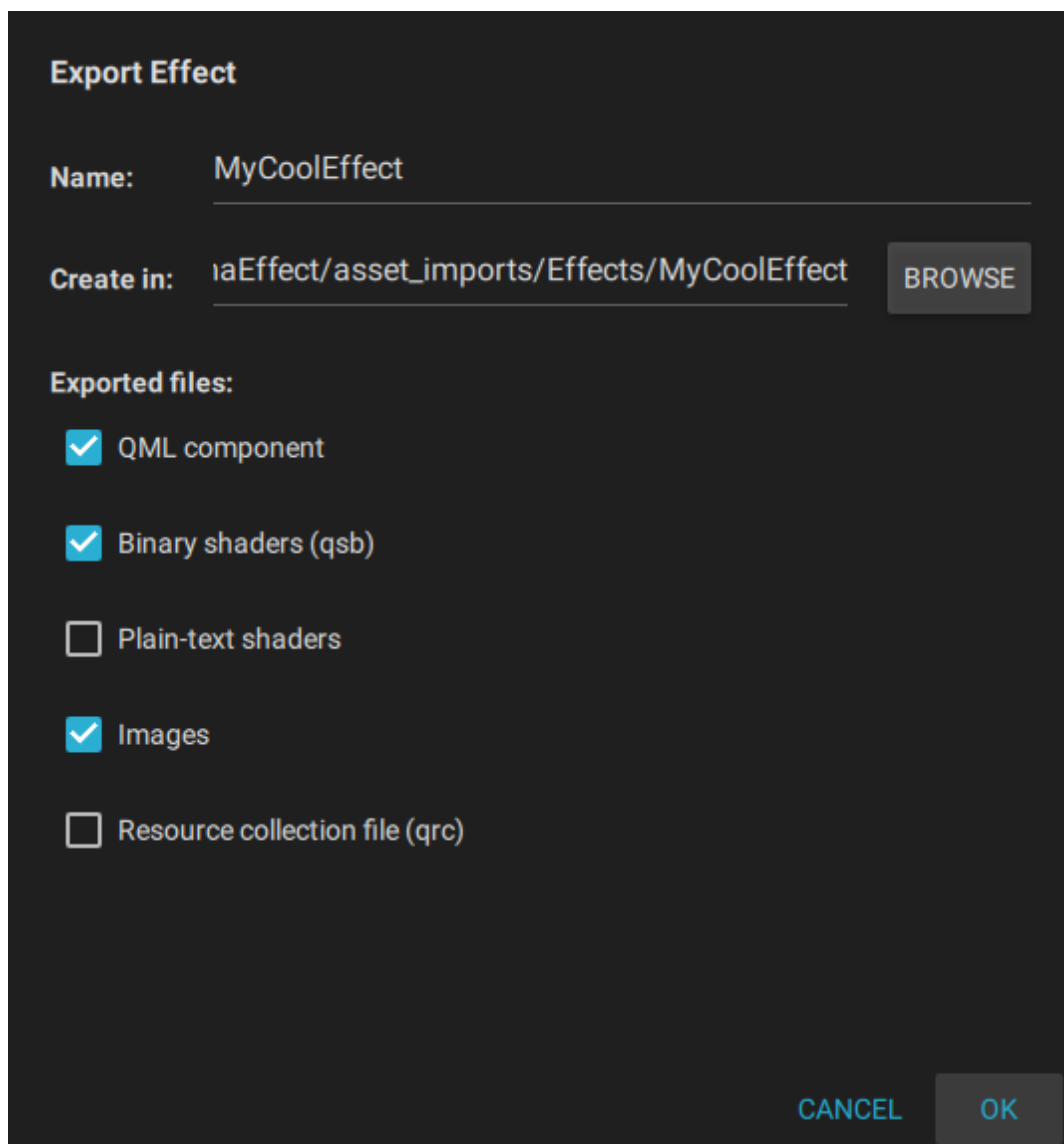

To open an Qt Quick Effect Maker file in Qt Quick Effect Maker from Qt Design Studio, double-click the file in the **Assets** view.

## Creating an Effect File in Qt Design Studio

You can create Qt Quick Effect Maker effect (.qep) files in Qt Design Studio and then edit them in Qt Quick Effect Maker.

To create an effect file:

1. In Qt Design Studio, right-click in the **Assets** view and select **New Effect**. Qt Design Studio creates an effect file and opens it in Qt Quick Effect Maker.
2. Edit the effect.
3. In Qt Quick Effect Maker, select **File > Save**.
4. Select **File > Export**.
5. With the default settings, select **OK**.

Now, you can close Qt Quick Effect Maker and go back to Qt Design Studio.
